  The Complete Javascript Course 2023: From Zero to Expert.
  HTML and CSS
  Completed in 2023

- KENYATTA UNIVERSITY

  Bachelor of Science in Environmental Health

  Completed in 2021

About Me

Dedicated and detail-oriented Frontend Web Developer with 2 years of learning experience. Eager to apply skills in building high-quality responsive user-interfaces, implementation of APIs and backend services to ensure seamless data exchange between frontend and backend systems. Special interest in working closely with all the stakeholders to understand business goals and user requirements, and translate them into effective frontend solutions.

Projects Created

SYSTEM FOR TRACKING PDF PAYMENTS WITHIN ELCK CDC
2023

One challenge that I noticed as I worked at ELCK CDC was the lack of a proper way of tracking the monthly parental contributions within the project. Consequently, after acquiring knowledge on API integration I created an app that allows the project to get notifications any time an individual sends some amount to their account. A link for the same is on my GITHUB account

ELCK CDC WEBSITE

2023

Came up with a website for ELCK CDC, thus ensuring their online presence and consequently marketability. A link for the same is available on my GITHUB account.

RARIEDA KALOO-CDC WEBSITE

2023

Came up with a website for ELCK CDC, thus ensuring their online presence and consequently marketability. A link for the same is available on my GITHUB account.

Achievements

2023	Created a system for tracking the PDF payments within ELCK CDC.
2023	Created websites for ELCK CDC and its Satellite (RariedaKaloo-CDC) which I was managing as I learn thus ensuring marketability of the two projects
